As the new owners of xtagged. The number one rule is that you must have a pic of you and your car in fist upload. or we must delete your portal. once your portal is up to date we will feature you on front page MyXtag.com. you have until dec.31 2009 to upload pic of you and car or unfortunately we will have to delete your portal if rules are not followed Thank you Managment

Andy will still be on board. He will be to Xtagged what Tom Anderson is to myspace!

Thank you Andy for bringing us aboard.

Becky your are the strength of all my faith, it will be people such as you that surround me from here forward. The drink is called buzz for buzz driving and

wiser for wiser mentor so really has nothing to do with budweiser god just gives me roads that are very lite up. meaning he is are guide and people will notice, us stand for him as mosses did with his staff. Just turn that around he gave mosses a staff that people could have manipulated to be violent. Now we are his staff, are employer has called on to us becky to make this workplace called earth aware that your job is as important as any other here in this world. I read once that we are like the single thread in a patten that leads to an ultimate design, and that design does not fit the pattern we all are living. In this world so we, us together will bring Balance with the wonders of our lord that i love with all my might. "MONEY" WHAT'S THAT

Andy,

I just wanted to insure that you have run the name Buzz Wiser by an Infringement lawyer. It is not enough to have a different spelling; the infringement law also involves similarity and familiarity in sound. I could be wrong; however, I wake up at 2:00 a.m. every morning with a nightmare of your being sued by Budweizer. I am assuming that you have checked this out; however, I could never forgive myself if I did not bring this to your attention.

"Substantial similarity is an important concept in United States copyright law, a necessary element in legally proving copyright infringement has occurred. It is a term with two subtly different meanings, in that it is frequently applied (along with "probative similarity") to the level of similarity necessary to prove that copying has occurred, but is also separately used to indicate whether the amount of such copying is substantial enough to constitute a legal concern. In both meanings, it is applied to all kinds of copyrightable works: fiction and no

Right, sounds awesome! Which clubs have pre-ordered? I will make sure there is plenty of web support for each club's launch. What's this about you suing City Weekly? :-)
